Management roles in Healthcare/HealthTech

PS

Ak

After 8 years as an ICU nurse, I know exactly where healthcare software fails patients and providers. Now I'm channeling that frontline experience into building better products.

Why the switch? Because every shift I watched nurses fight clunky EHR systems instead of focusing on patients. I became the go-to "tech person" on my unit—training colleagues on Epic, proposing workflow improvements, collaborating with IT on customizations. Eventually I realized: I want to be on the other side, building the tools.

What I bring to the table:

- Deep domain expertise in clinical workflows, EHR systems (Epic, Cerner), and regulatory compliance (HIPAA, FDA)
- Firsthand understanding of user pain points—I've lived them for nearly a decade
- Product School certification + hands-on projects (built two healthcare apps)
- The ability to translate between clinical and technical teams

## Recent projects:

- 📱 NurseShift - Built a shift-swapping app now used by 230 nurses at 3 Austin hospitals
- 🏆 MedRemind - Won "Best Healthcare Solution" at Product School demo day

I'm looking for my first PM role in digital health, where I can combine clinical expertise with product skills to build tools that actually work for healthcare workers and patients.

Let's connect if you're working on healthcare technology or hiring for PM roles in healthtech!

## Licenses & Certifications

### Product Management Certificate

Product School

Issued Dec 2024

### Google Project Management Professional Certificate

Coursera

Issued Oct 2024

### HIPAA Privacy & Security Certification

American Health Law Association

Issued 2019 • Expires 2025

### SQL for Data Analysis

DataCamp

Issued Sep 2024

### Figma for UX Design

Coursera

Issued Aug 2024

### Registered Nurse (RN)

Texas Board of Nursing

Issued 2016

## Projects

### NurseShift - Shift Scheduling App

**NS** Personal Project

2024 - Present

Mobile app solving the nurse shift-swapping pain point.

- Conducted 45 user interviews with ICU and ER nurses to validate problem
- Designed and built MVP using React Native and Firebase
- Launched beta with 230 nurses at 3 Austin-area hospitals
- Achieved 78% weekly active user retention after 60 days

**MR****MedRemind - Medication Adherence Tracker**

Product School Capstone

2024

Medication reminder app for elderly patients with complex regimens.

- Led 4-person team through discovery, design, and prototype phases
- Conducted user research with 20+ elderly patients and caregivers
- Won "Best Healthcare Solution" at demo day (judged by VCs and healthcare executives)

## Experience

**S****Charge Nurse, Intensive Care Unit**

Seton Medical Center

Jun 2019 - Present • 5 yrs 7 mos

Austin, Texas

- Manage 12-bed ICU with team of 8 nurses, coordinating care for 2,400+ critically ill patients annually
- Selected as "Super User" for Epic EHR implementation; trained 45 staff and reduced documentation errors 28%
- Led quality improvement initiative reducing central line infections by 42%
- Collaborated with IT to customize Epic workflows, improving nurse charting efficiency by 15 min/shift

**D****Registered Nurse, Medical-Surgical Unit**

Dell Children's Hospital

Aug 2016 - May 2019 • 2 yrs 10 mos

Austin, Texas

- Delivered bedside care for pediatric patients, specializing in family-centered care communication
- Identified medication workflow inefficiency; proposal adopted hospital-wide, saving 8 min/patient

## Education

UT

**The University of Texas at Austin**

Bachelor of Science in Nursing (BSN)

2012 - 2016

## Skills

User Research      Wireframing      Figma      Product Requirements Documents

Agile/Scrum      SQL      Jira      Epic EHR      Cerner      HIPAA Compliance

Clinical Workflows      HL7/FHIR      Stakeholder Communication

Cross-functional Collaboration      Patient Advocacy
