Management roles in Tech

AR

Ak

After 10 years leading federal technology programs, I'm ready to bring my skills to the private sector.

In government, I learned to ship software at scale under constraints most tech companies never face: strict compliance requirements, multi-year procurement cycles, stakeholder groups spanning dozens of agencies, and zero tolerance for security failures. I've led \$180M+ in IT programs serving 45,000+ users, and I've done it while introducing Agile practices to organizations that had been waterfall-only for decades.

What I bring from federal service:

- Delivered enterprise software at scale: cybersecurity tools for 2.4M endpoints, citizen portals processing 1.2M annual applications
- Led cross-functional teams of 60+ across contractors, federal staff, and agency partners

- Introduced Agile/Scrum to traditionally waterfall government teams (trained 80+ employees)
- Managed complex stakeholder environments with competing priorities and political sensitivities
- Deep expertise in compliance, security, and accessibility (FedRAMP, Section 508, HIPAA)

At GSA's 18F, I worked alongside some of the best technologists in public service, building modern digital services. That experience convinced me that the skills I've developed translating between technical and non-technical stakeholders, shipping under pressure, and leading without authority are highly transferable to tech product management.

I'm now pursuing product management roles where I can apply my program management foundation to building products, not just delivering them. I'm particularly interested in govtech, cybersecurity, and enterprise SaaS.

Let's connect if you're hiring PMs with unique backgrounds or if you're making the govt-to-tech transition yourself. Happy to share what I've learned.

Licenses & Certifications

Project Management Professional (PMP)

Project Management Institute

Issued 2016

Certified Scrum Product Owner (CSPO)

Scrum Alliance

Issued 2024

FAC-P/PM Level III

Federal Acquisition Institute

Issued 2019

AWS Cloud Practitioner

Amazon Web Services

Issued 2023

Experience

DHS

Senior Program Manager, GS-14

Department of Homeland Security - CISA

Jan 2020 - Present • 5 yrs

Washington, DC

Leading Continuous Diagnostics and Mitigation (CDM) program providing cybersecurity tools to federal agencies.

- Own \$85M program providing cybersecurity visibility tools to 23 federal agencies
- Manage 45-person cross-functional team including engineers, analysts, and vendor contractors
- Delivered dashboard product enabling real-time visibility into security vulnerabilities for 2.4M federal endpoints
- Reduced mean time to remediate critical vulnerabilities from 45 days to 12 days
- Author product requirements documents for major capability releases; coordinate with 8 vendor development teams
- Present program status to Deputy Secretary-level executives quarterly

18F

Program Manager, GS-13

General Services Administration - 18F

Jun 2017 - Dec 2019 • 2 yrs 7 mos

Washington, DC

Managed cloud migration and digital services modernization for partner agencies.

- Led \$52M cloud migration program moving 12 legacy systems to AWS GovCloud for 5 agencies
- Introduced Agile methodology to traditionally waterfall government teams; trained 80+ federal employees on Scrum
- Launched citizen-facing portal processing 1.2M annual applications; reduced processing time from 6 weeks to 8 days
- Conducted user research with 200+ citizens; achieved 4.2/5 satisfaction score

VA

IT Specialist (Project Manager), GS-12

Department of Veterans Affairs

Aug 2014 - May 2017 • 2 yrs 10 mos

Washington, DC

- Coordinated \$45M EHR modernization project across 8 VA medical centers serving 180,000 veterans
- Managed requirements gathering with clinical staff; translated healthcare workflows into technical specifications
- Earned "Outstanding" performance rating 3 consecutive years
- Selected for competitive leadership development program (5% acceptance rate)

Education

GW

George Washington University

Master of Public Administration (MPA)

2012 - 2014

Concentration: Public Sector Technology Management

UF

University of Florida

Bachelor of Arts - Political Science

2007 - 2011

Magna Cum Laude. Minor: Information Systems
